What is ComplyD?

ComplyD is a state-of-the-art data discovery and compliance enablement tool. It enables you to pro-actively take steps to meet any, securing and hardening your perimeter and avoiding expensive fines.

Key Features

Supports Regulatory compliance

Enables efficient Audit Framework

User and Role Analytics

Comprehensive visibility in a single dashboard

SAP-native solution runs on multiple devices

Customizable rulebook & KPIs for data protection

Flexible implementation with customization and extensibility

Continuous Monitoring of Privileged Access Management (PAM)

Do You Know Where Your Sensitive Data Is?

ERP and SAP systems contain terabytes of data and thousands of tables and transactions with various user access levels. A high degree of fragmentation makes it hard to track all sensitive data, leaving you vulnerable to compliance risks. ComplyD solves this challenge locating all sensitive data for your organization.

Is Your Sensitive Data Safe & Compliant?

Most organizations are unsure if any critical data is left unprotected and whether all the gaps are covered. Constantly evolving compliance requirements that vary across industries and countries necessitate protection of such data as per regulatory requirements. While SAP uses a role-based protection approach, ComplyD works with SAP and other systems to provide a higher degree of control with comprehensive visibility. This enables greater data level protection and facilitates data compliance.

End-to-End Compliance with DASH Approach

Discover

Discovers sensitive data vulnerabilities based on a customized rule book.

Analyze

Analyzes relevant measures to seal the discovered gaps.

Secure

Secures data by expanding your security perimeter.

Harden

Hardens entry points sealing them against potential attacks.

Empowering Organizations to Stay Compliant

ComplyD enables organizations in ANY industry to take action to meet data compliance requirements.

- GDPR
- CCPA
- HIPAA, HITECH or CMIA
- PCI DSS
- Additional Compliance

Benefits of Implementing ComplyD

Take a proactive compliance stance.

Minimize effort to produce compliance reports.

Reduce the risk of penalties.

Clearly demonstrate compliance measures.

What Clients Say

With better compliance measures, we don't have to worry about the possible violation of sensitive data. We get to take a proactive approach to compliance with no more worries about fines for lack of compliance.

CIO, Major IT Solutions & Services Company

With better compliance measures, we don't have to worry about the possible violation of sensitive data. We get to take a proactive approach to compliance with no more worries about fines for lack of compliance.

CSO, Global IT Solutions & Services Company
